

ADI JAIN

AI/ML Engineer | Full-Stack Developer | Software Engineer | CSE Graduate

adi1510jain@gmail.com | +91-8630497191 | linkedin.com/in/adi-jain-73334724b | github.com/Adi15Jain | adijain.click

PROFESSIONAL SUMMARY

AI/ML Engineer and Full-Stack Software Engineer with hands-on experience in **Machine Learning (ML)**, **Deep Learning (DL)**, and **Data Engineering** pipelines. Proven track record of delivering a **45 percent** page-load reduction for a university platform serving 150+ programs, engineering time-series forecasting models, and architecting containerized microservices with **Model Deployment** using **Docker** and cloud computing platforms.

EDUCATION

B.Tech (Computer Science Engineering) — Specialization in AI, ML & DL **GPA: 8.52 / 10.00**
Teerthanker Mahaveer University, Moradabad *Aug 2022 – May 2026*

Senior Secondary (XII) & High School (X) — Physics, Chemistry, Mathematics **CGPA: 8.2 / 10**
St. John's Senior Secondary School, Meerut *April 2018 – June 2022*

WORK EXPERIENCE

Teerthanker Mahaveer University — *Web Developer Intern* *Feb 2026 – May 2026*

- o Cut page load time by **45 percent** by implementing adaptive HLS streaming, asset preloading, and lazy-loaded DB queries via IntersectionObserver API.
- o Redesigned the university homepage (Laravel) serving **150+** academic programs in an **Agile/Scrum** team, boosting average session duration by **28 percent** through improved information architecture.

EvoAstra Ventures Private Limited — *Data Science Intern* *Sept 2025 – Dec 2025*

- o Built a market-level time-series churn pipeline on **1,700 records** (TRAI data) using advanced **Data Engineering** to extract 40+ temporal and competitive features.
- o Trained and benchmarked **4 Machine Learning models** (Logistic Regression, Random Forest, XGBoost, LightGBM) with SMOTE rebalancing, establishing a prediction pipeline.

PROJECTS

Interviewpilot — **AI Mock Interview Platform** | *Next.js - Vapi - PostgresQL* interviewpilot.adijain.click

- o Integrated client-side MediaPipe Face Mesh and Vapi voice AI to conduct real-time mock interviews; built feedback reports in NeonDB.
- o Deployed a containerized FastAPI microservice using **Docker** on **Render** with **CI/CD** pipelines via GitHub Actions, running a **4-model Machine Learning pipeline**.

TeleChurn — **Telecom Market Share Churn Predictor** | *Python - FastAPI* telechurn.adijain.click

- o Architected an Optuna-optimized time-series ensemble using **Data Engineering** and SMOTE rebalancing, achieving **87.2 percent** accuracy and **0.89 ROC-AUC**.
- o Deployed a FastAPI microservice and Frontend dashboard in HTML for **Model Deployment**, prescribing regional retention playbooks projecting **300 percent–500 percent ROI**.

CoinPush — **Real-Time Crypto Screening App** | *Next.js - CoinGecko API* coinpush.adijain.click

- o Built a live crypto screener with WebSocket-driven candlestick charts and real-time price feeds using Next.js and CoinGecko API, eliminating manual refresh cycles.
- o Implemented debounced **Cmd+K / Ctrl+K** command-palette search via SWR, preventing API rate-limit breaches and race conditions under high query load.

Exyst — **AI Exam Paper Analyzer** | *Next.js - Gemini - FastAPI* exyst.adijain.click

- o Developed a 6-stage pdfminer extraction pipeline and LLM page-classifier to automatically sort syllabus and question paper pages with **95 percent** accuracy.
- o Architected a **RAG** pipeline over academic PDFs for context-aware question synthesis with **Deep Learning** embeddings and **NLP** via Python and Next.js.

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C++

Machine Learning & AI: Scikit-learn, XGBoost, Deep Learning, LangChain, NLP, CNNs, RAG

Frameworks: FastAPI, Flask, ReactJS, Next.js, Node.js, TailwindCSS

Data Engineering & DBs: MySQL, PostgreSQL, MongoDB, Pandas, NumPy, ETL

Cloud & Tools: Docker, Render, CI/CD (GitHub Actions), Agile/Scrum, Git, Vite, Vercel

CERTIFICATIONS

o **Artificial Intelligence for Intermediate** — [IBM Skills Network](https://www.ibm.com/skills) *January 2025*
