PROFESSIONAL SUMMARY

AI/ML Engineer and Full-Stack Developer with hands-on experience in building and deploying production web applications, predictive ML pipelines, and real-time systems. Proven track record of delivering a **45%** page-load reduction for a university platform serving 150+ programs, engineering time-series forecasting pipelines, and architecting containerized microservices incorporating WebSockets, client-side computer vision, and semantic search RAG architectures.

EDUCATION

B.Tech (Computer Science Engineering) — Specialization in AI, ML & DL
Teerthanker Mahaveer University, Moradabad

GPA: 8.52 / 10.00
Aug 2022 – May 2026

Senior Secondary (XII) & High School (X) — Physics, Chemistry, Mathematics
St. John's Senior Secondary School, Meerut

CGPA: 8.2 / 10
2018 – 2022

WORK EXPERIENCE

Teerthanker Mahaveer University — *Web Developer Intern*

Feb 2026 – May 2026

- Cut page load time by **45%** by implementing adaptive HLS streaming, asset preloading, and lazy-loaded DB queries via IntersectionObserver API.
- Redesigned the university homepage (Laravel) serving **150+** academic programs, boosting average session duration by **28%** through improved information architecture and responsive design.

EvoAstra Ventures Private Limited — *Data Science Intern*

Sept 2025 – Dec 2025

- Built a market-level time-series churn pipeline on **1,700 records** (TRAI data), engineering 40+ temporal and competitive features to predict circle-level subscriber decline (5% Month-over-Month).
- Trained and benchmarked **4 ML models** (Logistic Regression, Random Forest, XGBoost, LightGBM) with SMOTE-based class rebalancing; XGBoost achieved the best F1 score across all candidates.

PROJECTS

Interviewpilot — **AI Mock Interview Platform**

[interviewpilot.adijain.click](#)

- Integrated client-side MediaPipe Face Mesh and Vapi voice AI to track expressions and conduct real-time mock interviews, generating feedback reports in NeonDB.
- Architected a Dockerized FastAPI microservice running a **4-model ML pipeline** (regression, clustering, anomaly detection) to predict user scores and archetypes (silhouette greater than 0.35).

TeleChurn — **Telecom Market Share Churn Predictor**

[telechurn.adijain.click](#)

- Architected an Optuna-optimized time-series ensemble (XGBoost, Random Forest, Logistic Regression) with SMOTE rebalancing, achieving **87.2%** accuracy and **0.89 ROC-AUC** predicting circle-level subscriber decline.
- Built a Streamlit simulation dashboard and FastAPI microservice prescribing regional retention playbooks, projecting **300%–500%** ROI on INR 2.5B revenue-at-risk.

CoinPush — **Real-Time Crypto Screening App**

[coinpush.adijain.click](#)

- Built a live crypto screener with WebSocket-driven candlestick charts and real-time price feeds using Next.js and CoinGecko API, eliminating manual refresh cycles.
- Implemented debounced **Cmd+K / Ctrl+K** command-palette search via SWR, preventing API rate-limit breaches and race conditions under high query load.

Exyst — **AI Exam Paper Analyzer**

[exyst.adijain.click](#)

- Developed a 6-stage pdfminer extraction pipeline and LLM page-classifier to automatically sort syllabus and question paper pages with **95%** accuracy.
- Architected a **RAG** pipeline over academic PDFs for context-aware question synthesis with Python and Next.js, targeting competitive and university exam preparation.

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C++

AI & ML: Scikit-learn, XGBoost, LangChain, NLP, CNNs, RAG

Frameworks: FastAPI, Flask, ReactJS, Next.js, Node.js, TailwindCSS

Databases: MySQL, PostgreSQL, MongoDB

Tools & Deployment: Git, Vite, REST APIs, GitHub Actions, Vercel, Render, NeonDB

CERTIFICATIONS

- **Artificial Intelligence for Intermediate** — [IBM Skills Network](#)

2025
